

DTM-Collection + PACTware™ - PACTware™ Info

Features of PACTware 3.6

PACTware 3.6 (Version 3.6.0.2) was released by the PACTware Consortium e. V. on July 18, 2008.

In comparison to the previous version PACTware 3.5, the following improvements and revisions have been implemented:

- Support of MS Windows Vista
Thus, the following operating systems are supported:
 - Windows 2000 SP4,
 - Windows XP, XP SP1, XP SP2
 - Windows Vista
- Improvement of the user interface:
 - Device catalogue management
 - DTM identification
 - Settings for print function
 - Improved user guidance for download functions
- TCI (Tool calling interface) Level 3 to implement PACTware in Engineering systems (for example SIMATIC STEP 7 from version 5.4)
