

Manufacturer Information CW9/2026

Software and hardware changes (according to NAMUR recommendation NE 53)

1. Type of device

- Field device
 Signal processing device
 Monitoring-operating system
 Operating system software

Manufacturer: VEGA Grieshaber KG
 Device: _____
 Type: DTM Collection 10/2025

2. Software

Previous software version:

	2

 .

0	6

 .

1	

 dated 16.12.2025
 New software version:

	2

 .

0	6

 .

2	

 dated 24.2.2026

The DTM Collection 10/2025 contains the frame application PACTware as well as the corresponding DTMs of the VEGA instruments.

Description of the changes compared to the previous version:

Error correction and enhancements of the VEGA DTM Collection. Further details of the software history and the function volume see VEGA homepage: www.vega.com under Downloads.

3. Hardware I

Previous hardware version:

 .

 .

 dated _____
 New hardware version:

 .

 .

 dated _____

Description of the modification in comparison with the predecessor version:

-

4. Software compatibility

Is a software replacement necessary?

- No
 Yes, reason: Critical miscalculation in the linearization function during flow measurements eliminated.

Is compatibility given after installation of the new software?

- Yes
 No, description:

How can the replacement be carried out? (Description of the procedure)

The software update is carried out with the setup on the PC.

4. Instruction manual

Is a modification of the instruction manual necessary due to the modification of the software or hardware?

Yes,

Device type	new instruction no.	dated

No,

Device type	previous instruction no.	dated
PACTware/DTM Collection	28243	23.01.2025

5. Price

Change in price of device in comparison with previous version?

No

Yes

Previous list price of device: _____ €

New list price of device: _____ €

Price for update (without installation): _____ €

Previous hardware version:

		.			.		
--	--	---	--	--	---	--	--

 dated _____
 New hardware version:

		.			.		
--	--	---	--	--	---	--	--

 dated _____

Description of the modification in comparison with the predecessor version:

-

4. Software compatibility

Is a software replacement necessary?

- No
 Yes, reason: Required for operating the new device type VEGAPULS 6X EtherNet/IP.
 Furthermore, various improvements have been made and bugs fixed.
 Details, see Software Version History in the download area at www.vega.com

Is compatibility given after installation of the new software?

- Yes
 No, description:

How can the replacement be carried out? (Description of the procedure)

The software update is carried out with the setup on the PC.

4. Instruction manual

Is a modification of the instruction manual necessary due to the modification of the software or hardware?

Yes,

Device type	new instruction no.	dated
PACTware/DTM Collection	28243	25.09.2025

No,

Device type	previous instruction no.	dated

Previous hardware version:

 .

 .

 dated _____
 New hardware version:

 .

 .

 dated _____

Description of the modification in comparison with the predecessor version:

-

4. Software compatibility

Is a software replacement necessary?

- No
 Yes, reason: This version contains a critical bugfix regarding VEGAPULS 10, 20, 30.

Is compatibility given after installation of the new software?

- Yes
 No, description:

How can the replacement be carried out? (Description of the procedure)

The software update is carried out with the setup on the PC.

4. Instruction manual

Is a modification of the instruction manual necessary due to the modification of the software or hardware?

Yes,

 New hardware version:

		.			.		
--	--	---	--	--	---	--	--

 dated _____

Description of the modification in comparison with the predecessor version:

-

4. Software compatibility

Is a software replacement necessary?

- No
 Yes, reason: The illustration in the linearisation wizard for the calculation of a rectangular channel according to the ISO standard has been improved.

Is compatibility given after installation of the new software?

- Yes
 No, description:

How can the replacement be carried out? (Description of the procedure)

The software update is carried out with the setup on the PC.

4. Instruction manual

Is a modification of the instruction manual necessary due to the modification of the software or hardware?

Yes,

Device type	new instruction no.	dated

 .

--	--

 .

--	--

 dated _____

Description of the modification in comparison with the predecessor version:

-

4. Software compatibility

Is a software replacement necessary?

- No
 Yes, reason:
 The DTM Collection version mentioned here offers support of new functions of the latest instrument software for different instrument families (e.g. for VEGAMET 140/340/840 and 860 series, VEGAPULS 6X, ...) as well as extensions concerning the supported languages.
 Details see point 2.

Is compatibility given after installation of the new software?

- Yes
 No, description:

How can the replacement be carried out? (Description of the procedure)

The software update is carried out with the setup on the PC.

4. Instruction manual

Is a modification of the instruction manual necessary due to the modification of the software or hardware?

 New hardware version:

 .

 .

 dated _____

Description of the modification in comparison with the predecessor version:

-

4. Software compatibility

Is a software replacement necessary?

- No
 Yes, reason:

The operation of the newly launched products VEGAPOINT 24 or VEGAPULS Air 41 and 42 requires in any case the update mentioned here.

Otherwise see point 2.

Is compatibility given after installation of the new software?

- Yes
 No, description:

How can the replacement be carried out? (Description of the procedure)

The software update is carried out with the setup on the PC.

4. Instruction manual

Is a modification of the instruction manual necessary due to the modification of the software or hardware?

Yes,

Device type	new instruction no.	dated
PACTware/DTM Collection	28243	22.1.2021

No,

Device type	previous instruction no.	dated
PACTware/DTM Collection	28243	9.9.2020
