

VEGABAR 28

Two-wire 4 ... 20 mA

Pressure sensor with ceramic measuring cell

Application area

The VEGABAR 28 is a universally applicable pressure sensor with switching function and ceramic measuring cell. It is used for measuring gases, vapours and liquids. Even with high requirements for robustness and hygiene, the device records the measured values with high accuracy.

The optional universal connection for hygienic adapters reduces the installation effort and stockkeeping.

Your benefit

- High plant availability through maximum overload and vacuum resistance of the ceramic measuring cell
- Coloured 360° status indication
- Convenient wireless setup and diagnostics with smartphone via Bluetooth
- Easy integration into control systems due to a variety of connection technologies

Function

The heart of the pressure transmitter is the pressure measuring cell transforming the pressure into an electrical signal. This pressure-dependent signal is converted by the integrated electronics into a standardized output signal.

Sensor element with VEGABAR 28 is the ceramic CERTEC® measuring cell with excellent long-term stability and high overload resistance.
