

Certificate for compliance with the regulations

The source holder VEGASOURCE 81 is a Type A package according to IAEA guidelines for the transportation of sealed radioactive material in a special form (labeling isotope, activity, no.) with a lead-lined metal housing.

VEGA Grieshaber KG
Am Hohenstein 113
77761 Schiltach

hereby declares under its sole responsibility as manufacturer,
 that the source holder

VEGASOURCE 81

meets the requirements for the international transport of dangerous goods for a TYPE A package in connection with the valid VEGA operating instructions and safety instructions.

The source holder is intended for the transport of sealed radioactive material in special form in accordance with transport law requirements.

The suitability as a TYPE A package was fulfilled by a design test according to the international requirements and documented by internal test reports.

Quality assurance during the development, manufacture and testing of the source containers is carried out in accordance with international and national guidelines. The procedure is described in the quality management plan.

Mentioned guidelines:

Applicability: TYPE A	Standard, document
International transport of dangerous goods	ADR/RID: 2020 IATA/DGR: 2020
Type test	IAEA SSR-6: 2018, Kap. VII Test report VEGAZW-6-70224 *
