1 Product description

1.1 With source holder VEGASOURCE 31, 35

The KV 31 is a mounting bracket for the radiometric measuring system MINITRAC. It is suitable for pipes irradiated at right angles.

Fig. 1: Mounting bracket with horizontally mounted sensor

Scope of delivery

The following parts belong to the scope of delivery of KV 31.

Fig. 2: Mounting bracket for pipes irradiated at right angles KV 31, horizontal sensor mounting

- 1 Threaded rod M10 x 620 mm (M10 x 24.41 in), (4 pieces)
- 2 Hexagon nut M16 (4 pieces)
- 3 Hexagon nut M10 (16 pieces)
- 4 Washer for M16 (4 pieces)
- 5 Clamp, Source holder side (1 piece)
- 6 Washer for M10 (8 pieces)
- 7 Hexagon screw M8 (2 pieces)
- 8 Clamp, Sensor side (MINITRAC), (1 piece)

1.2 With source holder VEGASOURCE 81, 82

The KV 31 is a mounting bracket for the radiometric measuring system MINITRAC. It is suitable for pipes irradiated at right angles.

Fig. 3: Mounting bracket with horizontally mounted sensor

Scope of delivery

Fig. 4: Mounting bracket for pipes irradiated at right angles KV 31, horizontal sensor mounting

- 1 Threaded rod M10 x 620 mm (M10 x 24.41 in), (4 pieces)
- 2 Hexagon nut M16 (4 pieces)
- 3 Hexagon nut M10 (16 pieces)
- 4 Washer for M16 (4 pieces)
- 5 Clamp, Source holder side (1 piece)
- 6 Washer for M10 (8 pieces)
- 7 Hexagon screw M8 (2 pieces)
- 8 Clamp, Sensor side (MINITRAC), (1 piece)

1.3 High temperatures

To protect the sensor against high temperatures, the mounting bracket can be equipped optionally with a heat protection kit.

The surface temperature of the tube can be up to max. +100 °C (212 °F) with heat protection kit with insulating boards.

Check the local conditions (high surface or ambient temperature).

Contact our specialists, if you are not sure.

2 Mounting with source container VEGASOURCE 31, 35

2.1 Mounting bracket

Operating instructions

Take note of the operating instructions of the corresponding sensor MINITRAC and the source holder.

Mounting brackets for horizontal mounting

Take note of the following mounting instructions:

- Mount the bracket first, then the sensor and the source holder
- The arrow cutouts in the clamp (source container side) and in the transport lug of the source holder must point in the same direction (A) after mounting
- Make sure that the two clamps (5 and 8) of the bracket are in parallel. Do this by measuring the lateral distances between the clamps
- To avoid injuries, shorten the threaded rods (1) of the brackets to a suitable length after mounting

Horizontal sensor mounting

Mount the bracket according to the following assembly drawing:

Fig. 5: Mounting bracket with horizontally mounted sensor

- 1 Threaded rod M10 x 620 mm (M10 x 24.41 in), (4 pieces)
- 2 Hexagon nut M16 (4 pieces)
- 3 Hexagon nut M10 (16 pieces)
- 4 Washer for M16 (4 pieces)
- 5 Clamp, Source holder side (1 piece)
- 6 Washer for M10 (8 pieces)
- 7 Hexagon screw M8 (2 pieces)
- 8 Clamp, Sensor side (MINITRAC), (1 piece)
- A Arrow cutouts of the clamp and eyebolt point in the same direction

1. Make sure that the two clamps of the bracket are parallel to each other. Do this by measuring the lateral distances between the clamps.
2. Tighten the nuts of the threaded rod evenly. Keep the tube diameter and the stability of the tube material in mind. Avoid deformation of the tube through an overtightening of the mounting bracket.

If you have the impression that the tube cannot permanently carry the weight of the mounting bracket, sensor and source container, mount a suitable support below the mounting bracket.

3. Shorten the threaded rods after mounting to avoid injuries.

Install a protective grid

If there are gaps or empty spaces around the installation, provide protective fences or grids to keep hands away from the dangerous area. Such areas must be marked accordingly.

Install a protective grid on both sides of the mounting bracket. A sheet metal cover or a correspondingly shaped plastic sheet can also be used.

Corresponding holes for screws of size M5 are provided on the mounting bracket.

Mount the protective grid according to the following assembly drawing:

Fig. 6: Install the protective grid on both sides of the mounting bracket

- 1 Protective grid
- 2 Screws M5 (pieces)

2.2 Heat protection kit

Tubes or vessels with hot products lead to high temperatures on the sensor due to heat radiation.

Optional heat protection kit

A heat protection kit with several insulating boards can be used on the mounting bracket as an option to protection against radiation heat.

The heat protection kit protects the sensor reliably against heat up to a surface temperature of the tube of 100 °C (212 °F).

For the sensor side a special bracket must be used for this purpose. Hence the heat protection kit must be also taken into account while ordering. A retrofitting is not possible.

→ Mount the heat protection kit according to the following illustrations:

Fig. 7: Mounting of the heat protection plates

- 1 Bracket, sensor side (MINITRAC)
- 2 Plastic washer M10 (12 pieces)
- 3 Plastic washer 305 x 305 (2 pcs.)
- 4 Clamp, U-shape (2 pcs.)
- 5 Washer M10 (4 pieces)
- 6 Spring ring M10 (4 pieces)
- 7 Screw M10 x 90 (4 pcs.)

4.2.2 Dimensions with source container VEGASOURCE 81, 82

Note:

When calculating the length, also take into account optional attachment parts such as the pneumatic changeover, cooling devices, etc.

Depending on the version of the source container, the dimension "L" is extended.

For dimensional information on the versions, please refer to the operating instructions of the source container.
