

## VEGATOR 122

### Double channel controller for level detection for 8/16 mA sensors

#### Application area

The VEGATOR 122 is a controller for point level detection with the vibrating level switches VEGASWING, VEGAVIB and VEGAWAVE with electronics version "Two-wire 8/16 mA". Simple control functions can be realised with this combination. Typical applications are monitoring functions such as overflow or dry run protection.

#### Your benefit

- Comprehensive monitoring detects short-circuit and measuring line break as well as malfunctions in the sensor
- Simple and convenient function test via test keys for both channels (also for SIL and WHG)
- Simple mounting through carrier rail as well as detachable, coded terminals

#### Function

The VEGATOR 122 is a double channel instrument and is mainly used for point level detection, for example in conjunction with vibrating level switches. It transmits binary signals from the field. The signals can also come from a hazardous area. Level switches with 8/16 mA step signal can be connected to it. The signal circuit is monitored for line break and shortcircuit. An operating relay (output) per channel is available as limit value signaller for control tasks

#### Approvals

Worldwide approvals are available for VEGA instruments, e.g. for use in hazardous areas, on ships or in hygienic applications.

The technical data in the respective safety instructions are valid for approved instruments (e.g. with Ex approval). In some cases, these data can differ from the data listed herein.

You can find detailed information on the existing approvals with the appropriate product on our homepage.

#### Technical data

##### General data

Series Module unit for mounting on carrier rails  
35 x 7.5 acc. to EN 50022/60715

##### Connection terminals

– Wire cross-section 0.25 mm<sup>2</sup> (AWG 23) ... 2.5 mm<sup>2</sup> (AWG 12)

##### Voltage supply

##### Operating voltage

– Nominal voltage AC 24 ... 230 V (-15 %, +10 %) 50/60 Hz  
– Nominal voltage DC 24 ... 65 V (-15 %, +10 %)

Max. power consumption 3 W (8 VA)

##### Sensor input

Quantity 2 x analogue

Input type Active (sensor power supply by VEGATOR 122)

Measured value transmission Analogue 8/16 mA

##### Switching threshold

– On 12.1 mA  
– Off 11.9 mA

Current limitation 23 mA (permanently short-circuit proof)

Terminal voltage 18.2 V DC, ± 5 %

Internal resistance 200 Ω, ± 1 %

Detection line break ≤ 3.6 mA

Detection shortcircuit ≥ 21 mA

##### Relay output

Quantity 2 x operating relay

Contact Floating spdt

Switching voltage min. 10 mV DC, max. 253 V AC/50 V DC

Switching current min. 10 μA DC, max. 3 A AC, 1 A DC

Breaking capacity min. 50 mW, max. 500 VA, max. 54 W DC

##### Switch-on/Switch-off delay

– Basic delay 150 ms, ± 10 %  
– Adjustable delay 2/6/8 s, ± 20 %

##### Ambient conditions

Ambient temperature at the installation site of the instrument -20 ... +60 °C (-4 ... +140 °F)

##### Electrical protective measures

Protection rating IP 20

Overvoltage category (IEC 61010-1)

Pollution degree 2

## Electrical connection

- 1 Sensor circuit, channel 1 (8/16 mA)
- 2 Sensor circuit, channel 2 (8/16 mA)
- 3 Relay output channel 1
- 4 Relay output channel 2
- 5 Voltage supply

You can find details on electrical connection in the instrument operating instructions on our homepage at [www.vega.com/downloads](http://www.vega.com/downloads).
