

Reliable

High supply reliability because of dependable information

Cost effective

Maintenance-free operation

User friendly

Simple mounting and parameterisation

Pure water tank

Level measurement in the pure water tank

Pure water tanks are important storage facilities for periods of peak demand. They compensate for delivery fluctuations and enable efficient plant operation. The pure water tank is therefore not only a means of storage, it also serves as an equalizing tank. Reliable level measurement is therefore essential.

VEGAPULS C 22

Non-contact level measurement with radar in the pure water tank

- High measurement accuracy regardless of ambient conditions
- Reliable measurement ensures continuous water supply
- Maintenance-free operation through non-contact measurement

VEGADIS 82

External display and adjustment unit for 4 ... 20 mA/HART sensors

- Measured value display can be connected anywhere to the supply cable of the sensor.
- Easy-to-read display with plain text and graphics
- Simple operation via four keys and clearly structured menu

Measuring range - Distance

20 m

Process temperature

-40 ... 80 °C

Process pressure

-1 ... 3 bar

Accuracy

± 2 mm

Frequency

80 GHz

Beam angle

8°

Materials, wetted parts

PVDF

Threaded connection

G1½, 1½ NPT, R1½

Seal material

FKM

Housing material

Housing material

Housing material

Plastic

Aluminium

Stainless steel (precision casting)

Protection rating

IP66/IP67

Ambient temperature

-20 ... 70 °C

Signal input (specify)

4 ... 20 mA/HART
